I did a quick term search throughout all the comments and didn't find it. I also didn't notice any reference to it in Nomellini's letter. If it is referenced in any of the scanned pdfs, it may have escaped my search.

Erin (and those of you I hope are reading over our shoulders),

Last year I was asked to critically review a proposal from the south delta water users about a plan called Delta Corridors. Do you know if it was referenced in any of the comments to us, perhaps in the comments of Dante Nomellini? I was just reminded via email of the request to review it and it does address several of the WQ issues we raise in the ANPR, although in a way that at first glance does not seem sustainable or entirely feasible. However, it is a plan separate from BDCP and addresses issues that BDCP seems to avoid, so it may be a good framework for some of our discussion.

In brief their plan isolates the SJ river in channels through the south delta to the bay from a stream of water coming through screened diversions at the Delta Cross Channel and Georgiana Slough to flow through the delta and supply export needs and south delta ag WQ needs.

thanks

Bruce

Subject: List of ANPR commenters

Hi All,

I'm in the process of setting up a directory on the shared drive in water division where all the comment documents will be located. Attached is an excel spreadsheet with all comment files listed with other comment information. The comment files are hyperlinked to the files, but I don't think that will work ... click on the linked file name and check it out to see?? It will work though to identify the file name with the commenter for a quick review of the range of comments we received.

Ae-ran Davis is setting up a print file of all comments and an electronic directory. I'm in the (slow) process of sending her all the comments. I'm cc'ing ASC b/c they are assisting us with comment management.
